No bleeds or trim marks please.

FILE SUBMISSION & INFORMATION

- **Community Magazine** is a quarterly digital publication that is produced once a year in both a print and digital format. The information on this sheet is for **digital-only ads**.
- Please use the following naming convention for your file: the advertiser's company name as it should appear in the index of the magazine (i.e., **advertiser_name.pdf** or **advertiser_name.jpg**)
- When creating your artwork with photos included, use high quality images ≥ 150 ppi.
- For files created in a layout program such as InDesign, embed all images before exporting to PDF.
- For files created in a vector-based format such as Adobe Illustrator, be sure to embed images before generating the PDF file.
- For files created in Photoshop, flatten artwork (no layers) before generating the PDF.
- Using Canva? Output your flattened PDF in the higher "for print" resolution.
- Still having issues creating a <1.5MB high-quality PDF file? Output your design to a high quality JPEG at 100% (no bleeds or trim marks) and we will do the conversion to PDF for you, no problem!
- If you have created your file in a layout program, check for fine white outlines (stitching). If you see this issue, they will appear in the digital magazine. Check to be sure that a PDF-X export isn't causing this issue by exporting to "High Quality Print" instead. [More help here Adobe helpx.](#)
- **Submit your file** [to this link.](#)
